Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Cruz F. Isabel (User-Defined Visual query Languages).

Regarding on claims 1, 9, 15, 24, 31 and 39 Cruz teaches a method for obtaining information from a relational database, comprising the steps of:

Formulating a query to retrieve data form the database, where a first portion of the query specifies the data to be retrieved and a second portion of the queries specifies a format for graphing the data (queries) (page 1, right column, lines 13-13);

Transmitting the query to the database (transmitting the query before retrieve result for graphing) (page 1, right column, lines 11-13);

Causing data to be returned from the database in accordance with the query (as to queries retrieved data and graphing the data) (right column, lines 11-13);

Presenting the data in accordance with said format (a display to be visually specified) (right column, page 1, lines 18-19 and right column, lines 16).

Regarding to claims 2, 16, 25 and 32, Cruz teaches a method according to claim 1, wherein the first portion of the query and the second portion of the query are for language (SQL) (relational) (left column, page 1, line 22).

Regarding on claims 3, 11, 20, 26 and 33 Cruz teaches a method of claim 1, wherein the data is returned as a binary image and presented as a graph (graphs, bar, chart or pie) (page 1, left column, lines 8-12).

Regarding on claims 4, 12, 21, 27 and 34 Cruz teaches a method of claim 1, wherein an image representation of data in ASCII format is returned from the database and presented as a graph (data presented in the database in ASCII format and played in a user specified) (page 1, left column, lines 18-19).

Regarding on claims 5, 13, 17, 28, 35 and 38, Cruz teaches a method of claim 1, wherein said step of causing the data to be returned comprising interpreting the query in accordance with a structure query language (SQL) having keywords and syntax for specifying format (the interpretation of the query is in the software in order to be compatible to the database system to retrieve data and graph) (page 21, left column, line 22);

Regarding on claims 6, 14 and 36, Cruz teaches a method of claim 5, wherein the graphical image is one of a line graph, a horizontal bar chart, a vertical bar chart, a pie chart, a scatter plot, a contour plot, and a wafer map, in accordance with a keyword in the second portion of the query (graphs, bar charts, pie charts, and plot charts) (page 1, left column, lines 8-12).

Regarding on claims 7, 19, 30 and 37, Cruz teaches a method according to claim 1, wherein said step of causing the data to be returned further comprises:

Interpreting the first portion of the query to cause the data to be retrieved (query parameter need to be interpreted and to retrieve data from the database) (page 1, left column, lines 11-18);

Creating a dataset for the data (data need to be created for graph) (page 1, left column, lines 11-12);

Incorporating the data into the dataset (constructing the data into the required data set before graphing) (left column, lines 11-12); and

Constructing a graphical image using the data, in accordance with said format (page 1, left column, lines 18-19).

Regarding on claims 8, 17-18 and 40, Cruz teaches the method of claim 7, wherein said interpreting step further comprises parsing the query so that the first portion of the query and the second portion of the query are interpreted separately (query is parsed to determine what are being required to be retrieved) (page 1, right column, lines 11-12).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Li et al. (US. Patent No. 5,608,899) Patent date: 03/04/1997.

Li discloses the method of modifying the query to retrieve and graphically display the result in the graphical form.
